

## Pure harness

*Less is more – performance pure*

### The challenge

To design a high-quality, no-frills performance harness for sport climbers. This is the basic idea behind SKYLOTEC's latest top climbing harness.

### The solution

Pure unites a number of apparent opposites. Purist, no-frills design and minimum weight are combined with optimal freedom of movement and maximum safety. The harness also has unusual styling and an excellent fit. Its high-quality softshell outer material provides good stability and outstanding wear comfort. Its single binding construction and breathable SkyVent foam padding make it ideal for longer multi-pitch routes.

#### Pure:

- Weight: under 300 g
- Material: SkyVent & softshell
- Details: 2 gear loops
- Size: XS-L
- Retail price: 89,95 €

#### Characteristics:

- Perfect fit
- Purist design
- Anatomic 3D fit
- A lightweight, minimalist harness
